

Dock Mount Hardware Kit for Dori Poles & Flagpoles up to 20' tall

Our Dori Pole Dock Mount Kit is the professional way to mount Dori Poles and Flagpoles to docks. As well as being easy to install!

This is a complete kit that includes a 24" long aluminum 2" O.D. pipe, heavy-duty aluminum mounting bracket with stainless steel bolts and lock nuts, and a Dori Pole Dock Pole Bushing (see other side). Designed for many years of sunny and nasty weather. The horizontal attaching bolts will fit both aluminum and wood stringers.

Dori Pole Pennants and Flags not only add flair and colorful movement above docks and shorelines but also, Dori Pennants are known to deter nuisance birds from landing under the long, flowing pennants and the shadows they create.

Dock Mount Kit and all Dori Pole products are available wholesale to qualified marine stores.

Dock Pole Bushing

If your dock has the typical 2" (outside diameter) aluminum dock post, the black Dock Pole Bushing is an easy way to buffer the fiberglass Dori Pole or Flagpole from wearing on the aluminum post. It fits snugly into the top of the post. Remember, place a horizontal stop, such as a bolt through your dock post at about 18" from the top to avoid the Dori Pole from going too far into the post (and water) and losing valuable height. The inside diameter of the standard post is about 1.80".

Dock Mount Bracket

For permanent install. Recommended for the 19' three piece, the Dock Mount Bracket attaches *your* 2" O.D. aluminum post to dock. This convenient attachment method ships with 2" U-bolt and 2 lock nuts.

JR Mount Plate

For permanent install. Designed for the smaller 1/2" diameter 12' JR Dori Pole. The JR Mounting plate attaches to any flat surface. This 5" x 5" black coated steel plate is intended to be bolted or lag bolted to the side of rafts or docks.

This is also a suggested installation method for deterring geese and assorted birds from rafts.

Pontoon Mount for Dori Poles and Flagpoles

Designed to fit Pontoon Boats that have open top rails on sides and/or in front.

This bracket is not designed to fit pontoon boats with full side panels.
